

Lōner

Preparation is Half the Battle

Employees face risk every day from injury to possible health conditions and even assault. Preparation—including PPE, training, procedures, and mitigation—has made a big impact. But incidents still occur. Loner® safety monitoring solutions empower your organization to make a difference by responding in real-time, to your employee's precise location. Your optimized emergency response can make a difference when seconds count.

WHY BLACKLINE SAFETY?

- Complete, in-house product and software design enables Blackline to create a leading customer experience
- Public company, socially responsible, and transparent
- Millions of investment into safety monitoring research and development over the last 8 years
- In-house manufacturing provides versatility, allowing Blackline to meet customer expectations
- Industry-leading expertise, having worked with SMEs through Fortune 500 companies
- Current experience in the cable industry Comprehensive safety alert life cycle management

WHY LONER?

- Completely customizable for organizations in any industry
- Automatic detection of safety incidents plus manual triggering of emergency alerts (visual/audible and silent)
- SureSafe™ power connection light provides confidence to the user that real-time safety is monitored from end to end
- Precise employee positioning indoors and out using GPS and proprietary location beacon technology
- Work anywhere—broad portfolio for urban areas using cellular communication and remote sites using satellite uplink
- Industrial-grade products are built from the ground up to withstand the most demanding environments
- Increases productivity compared to periodic check-in procedures—Loner solutions more than pay for themselves
- Hassle-free, automatic, over-the-air firmware updates
- API for custom software integration of safety alerting
- Optional 24/7 Safety Operations Center service for turnkey safety monitoring
